1 A Couple of Limericks About Java

Tom moved to Java from JavaScript
And at that moment he was gripped.
While memorizing public static void main,
Will temporarily be his bane,
By knowing a more general purpose language he is now better equipped.

Tom has now been using Java for a bit
And there's a couple of things in the docs that don't quite fit.
With StringBuilder and StringBuffer,
he is adamant that Oracle wants him to suffer,
But never for a minute did Tom ever think to quit.
